

Maximize ROI with Secure IT Asset Value Recovery

2025

Unlock the hidden value in your retired technology assets with Global Asset's comprehensive value recovery solutions.

At Global Asset, our value recovery process begins with the secure collection of your IT assets, ensuring safe transportation to our 100,000 sq. ft. secure facility.

Once received, each item undergoes a comprehensive audit to assess its condition and determine potential resale or reuse value.

We then perform data destruction using industry-standard methods, issuing certificates of destruction to guarantee complete data security.

Next, we conduct a value assessment to identify opportunities for refurbishment, resale, or responsible recycling.

Finally, any non-viable equipment is managed through sustainable disposal practices that align with our zero-landfill policy and environmental compliance standards.

Checklist

ENSURE YOUR ORGANIZATION IS READY TO RECOVER MAXIMUM
VALUE FROM END-OF-LIFE IT ASSETS

01

ASSET IDENTIFICATION

Compile an inventory of decommissioned or underutilized IT equipment.

02

DATA SECURITY ASSESSMENT

Determine data-bearing devices requiring secure data destruction.

03

COMPLIANCE VERIFICATION

Confirm adherence to R2V3 and ISO 14001 standards for environmental and data security compliance.

04

LOGISTICS PLANNING

Arrange for secure transportation of assets to Global Asset's processing facility.

05

DOCUMENTATION PREPARATION

Gather necessary documentation for chain-of-custody and audit purposes.

Trusted by Public & Private Sector Leaders

CERTIFIED EXCELLENCE

Our operations are R2V3 and ISO 14001 certified, underscoring our commitment to responsible recycling and environmental management.

END-TO-END SERVICE

From asset pickup to final disposition, we manage the entire process, reducing your operational burden.

FINANCIAL RETURN

Our global network enables us to secure competitive returns on your retired assets.

DATA SECURITY

We prioritize the protection of your sensitive information throughout the value recovery process.

THANK YOU

Our team is here to provide secure, compliant, and sustainable value recovery solutions tailored to your organization's needs.
